Is that Hoyt's team or is there a better POC to send those list to?

That is good news. Would TCEQ benefit from our list? Thank you
Steve

Great... thanks...

The only one that I know we are paying close attention to is the Arkema facility, obviously....

TCEQ has been calling all of their priority facilities and I do not believe they have found any large issues...

Steve,

Not sure if these will be of use to you and your teams but wanted to provide these for Situational Awareness. We have been tracking our CFATS facilities since Friday and getting operational Statuses throughout the storm. If these are of use I would be happy to keep supplying them as we get

updates. I also have some that were not included in this email that are of the Corpus Christie Area as well as Louisiana as our sites have largely been unaffected other than shutting down/idle and are starting to come back up. I can provide those if you would like to see them as well.

Secondly do you guys have any facilities that you are tracking that potentially could be an issue? We are attempting to get a handle on the reporting from the field to ensure that we are aware of arising situations.

Thanks Steve and if you need anything from us please let me know.

Subject: 31 Aug 17, ISCD R6 Update

Afternoon All,

Update attached.

No change to Houston CFATS. Ingress/Egress issues remain. Impacts are from localized and river flooding. Concerns about supplies and logistical limitations from transportation issues.

1. Outreach calls are being focused on Beaumont / Port Arthur area and identified facilities in flooded / flood prone areas.
2. IOC review with R6 IP Office – no changes at this time.
3. Developed new tracking spreadsheet covering flood prone Houston area counties based on river flow. Cross-referenced the spreadsheet against current outreach to ensure efficacy (attached).
4. RFI tracking as required.

Regards,

Shawn
